

Summer Composting Tips Workshop

Got the
Summer Time
Compost Blues?

Windham Solid Waste Management District's
Backyard Composting Demonstration Site
Tuesday, July 20, 6-7:00 pm OR Saturday July 24, 4:30-5:30
WSWMD Transfer Station (327 Old Ferry Rd., Brattleboro)

Summer weather can make compost heat up more rapidly, but it can also dry it out faster.

Our Summer Composting Tips Workshop will include topics such as:

- Successful composting in the hot, dry weather
- How food scraps are great for bringing nutrients and moisture to compost
- Best ways to avoid attracting wildlife
- The pros and cons of different compost bins
- How to tell when compost is ready to use and ways to use it

The workshop is offered twice to better accommodate busy summer schedules.
Bring your composting questions and see you there!

What is a
Backyard Composting
Demonstration Site?

The Backyard Composting Demo Site features a variety of compost tumblers, bins, and tools suitable for use in home and community composting. Information about the bins, costs, and "how-to-compost" is kept onsite.

- * The Demo Site is open for self-guided learning
- * It can be used by garden clubs, schools, community groups, and others who want to offer compost workshops and hands-on learning opportunities
- * District staff will also offer free compost workshops at the Demo Site

*The Demo Site is located at the District's Transfer Station.
